

CHING-WEI KANG

Madison, WI | 347-866-8326 | ckang53@wisc.edu | [linkedin.com/in/kcw2027](https://www.linkedin.com/in/kcw2027) | github.com/WilliamK112

EDUCATION

University of Wisconsin-Madison

B.S. Computer Science and Data Science | GPA: 3.91/4.0

Relevant coursework: Data Structures & Algorithms, Artificial Intelligence, Computer Engineering, Discrete Math, Statistical Modeling, Linear Algebra.

Madison, WI

Expected May 2027

SKILLS

Programming: Python, TypeScript, Java, SQL, Go, C++

Technologies: Next.js, React, Node.js, FastAPI, Express, PostgreSQL, Redis, SQLite, Docker, AWS, REST APIs, RBAC, SSE, CI/CD

PROFESSIONAL EXPERIENCE

Global AI (Global API Inc.)

New York, NY | Hybrid

Full-Stack Engineering Intern

May 2026 - Present

- **Led backend development** for an AI video generation platform, building FastAPI services and PostgreSQL/Redis workflows for multistage media jobs with Gemini integration, asynchronous orchestration, validation, and failure recovery.
- **Implemented parallel task execution**, cache-backed processing, RBAC, observability, and CI/CD to reduce repeated work and improve reliability across long-running generation workflows and support repeatable production releases.
- **Partnered directly with the CEO and four departments** to translate product requirements into an SSE-streamed dashboard with real-time generation progress and operational visibility for stakeholder review, debugging, and release monitoring.

Guangdong Akang Health Technology Group Co., Ltd.

China | On-site

AI & Software Engineering Intern

Jul 2026 - Aug 2026

- **Built searchable research interfaces and structured JSON/SQLite pipelines**, normalizing multi-source records with provenance, validation metadata, reproducible exports, and traceable transformations across reports, evidence, company, and partner data.
- **Implemented automated checks** for completeness, citations, and source coverage, combining human review checkpoints with auditable workflows for reliable pharmaceutical research, traceable review, and downstream decision support.

China Association for Science and Technology (CAST)

United States | Remote

Research Assistant

Dec 2024 - Feb 2025

- **Built a Python linear model** and multi-source analysis workflow to forecast AI talent-allocation trends and translate policy data into evidence for national research stakeholders with documented assumptions and reproducible analysis.

SELECTED PROJECTS

ClearMove - Rental Evidence Platform

Oct 2025 - Present

Technologies: Next.js, TypeScript, PostgreSQL, Drizzle ORM, REST APIs, pdf-lib

- **Shipped a deployed full-stack platform** that converts lease and inspection inputs into auditable, timestamped PDFs across 21 API routes and 10 PostgreSQL tables, informed by 50+ stakeholder interviews and production-ready data exports.

Multi-Agent OpenClaw

Jan 2026 - Present

Technologies: TypeScript, Node.js, Express, Zod, REST APIs, persistent run state, automated tests

- **Built an orchestration API** with schema validation, persistent run memory, task routing, and QA-gated document exports; covered core workflows with seven automated tests and repeatable QA regression checks across document workflows.

TableUs - Group Restaurant Discovery

2026

Technologies: Next.js, React, Python, FastAPI, Gemini API, Google Maps API

- **Built a full-stack recommendation workflow** that combines group preferences, geospatial context, and natural-language input; earned Second Place at the 2026 Cursor Hackathon through an explainable, location-aware group decision flow.

ACHIEVEMENTS

- Third Prize, 2025 Badger Build Fest Venture Track - ClearMove
- Second Place (Skills) and Third Place (Qualification), 2023 VEX Robotics World Championship
