EDUCATION

University of Wisconsin-Madison

B.S. Computer Science and Data Science | GPA: 3.91/4.0

Relevant coursework: Artificial Intelligence, Statistical Modeling, Linear Algebra, Data Structures & Algorithms, Data Science Programming, Discrete Math.

The George Washington University

Undergraduate coursework in Computer Science and Data Science | GPA: 3.94/4.0

Madison, WI

Expected May 2027

Washington, DC

2023 - 2024

AI AND ENGINEERING SKILLS

Programming: Python, TypeScript, SQL, Java, Go, C++

AI systems: Gemini API, multi-agent orchestration, computer vision, reinforcement learning, JSON Schema, evaluation, human review

Engineering: FastAPI, React, Next.js, Node.js, PostgreSQL, Redis, REST APIs, SSE, Docker, CI/CD

RELEVANT EXPERIENCE

Global AI (Global API Inc.)

New York, NY | Hybrid

Full-Stack Engineering Intern

May 2026 - Present

- **Led backend development** for an AI video generation platform, integrating Gemini model calls into FastAPI services backed by PostgreSQL and Redis for reliable multistage inference workflows with structured validation and failure recovery.
- **Orchestrated parallel keyframe and video tasks** with cache-backed intermediate outputs, reducing repeated model calls while exposing real-time progress through SSE streaming, cache observability, and production debugging controls.
- **Partnered with the CEO and four departments** to translate AI workflow needs into production features with RBAC, observability, validation, and CI/CD controls for repeatable releases, stakeholder review, and operational monitoring.

Guangdong Akang Health Technology Group Co., Ltd.

China | On-site

AI & Software Engineering Intern

Jul 2026 - Aug 2026

- **Designed multi-agent research workflows** with evidence grading, human review checkpoints, and automated validation for traceable pharmaceutical market intelligence with source provenance, citation checks, and reproducible exports.
- **Developed searchable interfaces and structured exports** with source IDs, retrieval dates, and citation checks so AI-assisted findings remained auditable and reviewable across legal evidence, company data, and partner-verification workflows.

SELECTED AI PROJECTS

Multi-Agent OpenClaw

Jan 2026 - Present

Technologies: TypeScript, Node.js, Express, Zod, agent orchestration, persistent memory

- **Built a task-routing agent system** that selects workflows by complexity, persists run memory, and gates Markdown/DOCX outputs with automated QA across seven validated tests, persistent execution state, and regression-safe document workflows.

Badminton AI Match Analysis

2026

Technologies: Python, computer vision, player tracking, pose estimation, video processing

- **Built a computer-vision pipeline** that tracks two players, overlays pose estimates, recovers shuttle motion, and renders annotated video for repeatable match analysis, diagnostic review, structured performance comparison, and model debugging.

Adaptive Thinking and Reinforcement Learning

2026

Technologies: Python, PyTorch, DreamerV3, PPO, adaptive halting, experiment diagnostics

- **Benchmarked adaptive-computation and reinforcement-learning workflows**, documenting sparse-retrieval failures, training behavior, reproducible evaluation results, and failure-mode analysis across adaptive computation experiments.

ClearMove - AI Rental Evidence Platform

Oct 2025 - Present

Technologies: Gemini API, Next.js, TypeScript, PostgreSQL, Drizzle ORM, pdf-lib

- **Integrated Gemini into a deployed evidence workflow** that converts lease and inspection inputs into auditable PDFs, informed by 50+ stakeholder interviews, traceable data sources, production-ready evidence exports, and downstream review workflows.

ACHIEVEMENTS

- Second Place, 2026 Cursor Hackathon - TableUs
- Third Prize, 2025 Badger Build Fest Venture Track - ClearMove
