

CHING-WEI (WILLIAM) KANG

Madison, WI | 347-866-8326 | ckang53@wisc.edu | [linkedin.com/in/kcw2027](https://www.linkedin.com/in/kcw2027) | github.com/WilliamK112

EDUCATION

University of Wisconsin-Madison

B.S. Computer Science and Data Science | GPA: 3.91/4.0

Madison, WI

Expected May 2027

Relevant coursework: Artificial Intelligence, Data Structures & Algorithms, Statistical Modeling, Linear Algebra, Computer Engineering, Data Science Programming, Discrete Mathematics.

The George Washington University

Undergraduate coursework in Computer Science and Data Science | GPA: 3.94/4.0

Washington, DC

2023 - 2024

ACADEMIC PROFILE

Interests: Applied AI, multi-agent systems, trustworthy data workflows, computer vision, reinforcement learning, and production software systems.

Technical foundation: Python, TypeScript, Java, SQL, Go, C++, R; PyTorch, FastAPI, React/Next.js, Node.js, PostgreSQL, Redis, Docker, AWS, REST APIs, CI/CD.

RESEARCH AND PROFESSIONAL EXPERIENCE

Global AI (Global API Inc.)

New York, NY | Hybrid

Full-Stack Engineering Intern

May 2026 - Present

- **Led backend development** for an AI video generation platform, integrating Gemini inference with FastAPI, PostgreSQL, and Redis across multistage media workflows.
- **Implemented parallel execution, caching, RBAC, observability, CI/CD, and SSE streaming**; partnered with the CEO and four departments to translate product needs into reliable production features.

Guangdong Akang Health Technology Group Co., Ltd.

China | On-site

AI & Software Engineering Intern

Jul 2026 - Aug 2026

- **Designed multi-agent pharmaceutical research workflows** with evidence grading, human review checkpoints, automated validation, and auditable source provenance.
- **Built searchable interfaces and structured JSON/SQLite exports** for reports, legal evidence, company data, and partner verification across international healthcare markets.

China Association for Science and Technology (CAST)

United States | Remote

Research Assistant

Dec 2024 - Feb 2025

- **Analyzed AI policy and talent-allocation trends**, reconciled multi-source institutional evidence, and built a Python linear model for quantitative forecasting and stakeholder analysis.

The Marcus Harris Foundation

Washington, DC

Data Engineering and Automation Intern

Sep 2024 - Dec 2024

- **Designed a Python ingestion pipeline** using BeautifulSoup, Requests, and Pandas; parsed and loaded 50,000+ nonprofit tax records into PostgreSQL with 98% accuracy.

Springer Capital

Chicago, IL

Data Analyst and Automation Intern

Aug 2024 - Oct 2024

- **Analyzed operational data** with Python, SQL, Excel, and Power BI, then connected Power Platform and CRM workflows to improve management reporting and process visibility.

Chihuo Inc.

Remote

Data Analyst

Jun 2024 - Sep 2024

- **Analyzed demographic, behavioral, and preference data** with Python and Excel, contributing visualizations and findings to a 200+ page North American Asian food market white paper and stakeholder-ready market recommendations.

SELECTED TECHNICAL AND RESEARCH PROJECTS

Multi-Agent OpenClaw

Jan 2026 - Present

Technologies: TypeScript, Node.js, Express, Zod, agent orchestration, persistent memory, automated QA

- **Built a multi-agent orchestration system** that routes work by task type and complexity, persists run memory, and exports QA-gated Markdown/DOCX artifacts across seven validated tests.

Adaptive Thinking and Reinforcement Learning

2026

Technologies: Python, PyTorch, DreamerV3, PPO, adaptive computation, experiment diagnostics

- **Benchmarked adaptive halting and reinforcement-learning workflows**, documenting sparse-retrieval failure modes, training tradeoffs, and reproducible evaluation results.

Badminton AI Match Analysis

2026

Technologies: Python, computer vision, player tracking, pose estimation, video processing

- **Developed a two-player match-analysis pipeline** with stable tracking, pose overlays, shuttle recovery, and annotated video visualization.

ClearMove - AI-Powered Rental Evidence Platform

Oct 2025 - Present

Technologies: Next.js, TypeScript, PostgreSQL, Drizzle ORM, Gemini API, pdf-lib

- Led 50+ stakeholder interviews and shipped a deployed evidence workflow across 21 API routes and 10 PostgreSQL tables, transforming lease and inspection inputs into auditable, timestamped PDFs.

2026

TableUs - AI-Assisted Group Restaurant Discovery

2026

Technologies: Next.js, React, Python, FastAPI, Gemini API, Google Maps API

- Built an explainable group recommendation workflow combining user preferences, location, and natural-language input; earned Second Place at the 2026 Cursor Hackathon through an explainable, location-aware group decision flow.

Brain-Computer Interface MVP

2026

Technologies: Python, Streamlit, real-time signal pipelines, interactive visualization

- Built an end-to-end neural-signal prototype to process, inspect, and visualize streaming data for applied BCI experimentation.

OPEN SOURCE CONTRIBUTIONS

- Recorded 213 merged pull requests, including 201 merged contributions to external repositories, as verified through the GitHub API on September 22, 2026.
- Contributed through maintainer review and CI workflows to GitHub Docs, Docker CLI, Microsoft APM, NVIDIA NemoClaw, Meta DotSlash, Repomix, and other developer tools.

LEADERSHIP AND ACTIVITIES

- Badger Blockchain E-Board, Social Media and Communications | Summer 2026 - Present
- Badminton E-Board | Spring 2025 - Present
- China and U.S. Engagement at GWU - Founder and Head of Logistics | Aug 2024 - Present
- China Student Development Think Tank - Leader and Head Scheduler | Aug 2023 - Present
- UW-Madison Data Science Club - promoted technical events and organized weekly Python, R, and Excel workshops.
- VEX Robotics Club - built and maintained a C++ robot and evaluated routing strategies for competitive matches.

ACHIEVEMENTS

- Second Place, 2026 Cursor Hackathon - TableUs
- Third Prize, 2025 Badger Build Fest Venture Track - ClearMove
- Second Place, 2024 GWU Data Science Association Datathon (Python)
- Second Place (Skills) and Third Place (Qualification), 2023 VEX Robotics World Championship (C++)
