EDUCATION

University of Wisconsin–Madison	Madison, WI
<i>Bachelor of Science in Computer Science and Data Science GPA: 3.91/4.0</i>	<i>Expected Graduation: May 2027</i>
• Relevant coursework: Data Structures & Algorithms, Artificial Intelligence, Computer Engineering, Discrete Math, Statistical Modeling, Linear Algebra.	
The George Washington University	Washington, DC
<i>Undergraduate coursework in Computer Science and Data Science GPA: 3.94/4.0</i>	<i>2023 – 2024</i>

SKILLS

Programming:	Python, TypeScript, Java, SQL, Go, C++
Technologies:	Next.js, React, Node.js, FastAPI, Express, PostgreSQL, Redis, SQLite, Docker, AWS, REST APIs, RBAC, SSE, CI/CD

PROFESSIONAL EXPERIENCE

Global AI (Global API Inc.)	New York, NY Hybrid
Full-Stack Engineering Intern	<i>May 2026 – Present</i>
• Led backend development of an AI video generation feature, building FastAPI services and PostgreSQL/Redis workflows for multi-stage media jobs. • Implemented parallel task execution and caching to avoid redundant work in long-running generation; integrated RBAC, observability, and CI/CD into the backend workflow. • Worked directly with the CEO and four departments to assess engineering needs and deliver an SSE-streamed dashboard showing generation progress in real time.	
Guangdong Akang Health Technology Group Co., Ltd.	China On-site
AI & Software Engineering Intern	<i>Jul 2026 – Aug 2026</i>
• Built searchable research interfaces and structured JSON/SQLite exports; normalized multi-source records with source IDs, URLs, retrieval dates, and validation metadata for traceable analysis. • Implemented automated data checks for completeness, citations, and source coverage, with human review checkpoints to support reliable report review.	
China Association for Science and Technology (CAS)	United States Remote
Research Assistant	<i>Dec 2024 – Feb 2025</i>
• Analyzed policy trends across AI and strategic technology ecosystems, synthesized multi-source findings, and built a Python-based linear model to support quantitative forecasting and analysis for project stakeholders.	

PROJECTS

ClearMove – AI-Powered Rental Evidence Platform	<i>Oct 2025 – Present</i>
Technologies used: Next.js, TypeScript, React, Node.js, PostgreSQL, Drizzle ORM, pdf-lib, Gemini API	
• Built a deployed rental evidence platform with Next.js, TypeScript, PostgreSQL, and Drizzle ORM; converted lease and inspection inputs into auditable, timestamped PDFs for renters and property managers, informed by 50+ stakeholder interviews.	
Multi-Agent OpenClaw	<i>Jan 2026 – Present</i>
Technologies used: TypeScript, Node.js, Express, Zod, REST APIs, persistent run state, automated tests	
• Built a TypeScript/Express orchestration API with Zod validation, persistent run memory, task routing, and QA-gated document exports; covered core workflows with 7 automated tests.	
TableUs – AI-Assisted Group Restaurant Discovery	<i>2026</i>
Technologies used: Next.js, React, Python, FastAPI, Gemini API, Google Maps API	
• Built a full-stack restaurant discovery app that combines group preferences, location, and natural-language input to produce explainable recommendations.	

ACTIVITIES

UW-Madison Data Science Club
• Promoted coding events and online talks to UW–Madison students and organized weekly Python, R, and Excel workshops.
Vex Robotics Club
• Built and maintained a C++ robot and evaluated routing strategies to select optimal moves during matches.

ACHIEVEMENTS

1. Second Place , 2026 Cursor Hackathon — TableUs
2. Third Prize , 2025 Badger Build Fest Venture Track — ClearMove
3. Second Place , 2024 GWU Data Science Association Datathon (Python-based)
4. Second Place (Skills) and Third Place (Qualification) , 2023 VEX Robotics World Championship (C++-based)
