

CHING-WEI (WILLIAM) KANG

Madison, WI | 347-866-8326 | ckang53@wisc.edu | [linkedin.com/in/kcw2027](https://www.linkedin.com/in/kcw2027) | github.com/WilliamK112

EDUCATION

University of Wisconsin-Madison

B.S. Computer Science and Data Science | GPA: 3.91/4.0

Madison, WI

Expected May 2027

Relevant coursework: Artificial Intelligence, Data Structures & Algorithms, Statistical Modeling, Linear Algebra, Computer Engineering, Data Science Programming, Discrete Mathematics.

The George Washington University

Undergraduate coursework in Computer Science and Data Science | GPA: 3.94/4.0

Washington, DC

2023 - 2024

ACADEMIC PROFILE

Interests: Applied AI, multi-agent systems, trustworthy data workflows, computer vision, reinforcement learning, and production software systems.

Technical foundation: Python, TypeScript, Java, SQL, Go, C++, R; PyTorch, FastAPI, React/Next.js, Node.js, PostgreSQL, Redis, Docker, AWS, REST APIs, CI/CD.

RESEARCH AND PROFESSIONAL EXPERIENCE

Global AI (Global API Inc.)

New York, NY | Hybrid

Full-Stack Engineering Intern

May 2026 - Present

- **Made an AI video generation platform production-ready** by leading backend development with Gemini, FastAPI, PostgreSQL, and Redis across validated multistage workflows.
- **Reduced repeated work and improved operational visibility** through parallel execution, caching, RBAC, observability, CI/CD, and SSE streaming, while translating priorities from the CEO and four departments into reliable releases.

Guangdong Akang Health Technology Group Co., Ltd.

China | On-site

AI & Software Engineering Intern

Jul 2026 - Aug 2026

- **Made pharmaceutical research traceable** by designing multi-agent workflows with evidence grading, human review checkpoints, automated validation, and auditable source provenance.
- **Enabled reviewers to verify international healthcare findings** by building searchable interfaces and structured JSON/SQLite exports across reports, legal evidence, company data, and partner records.

China Association for Science and Technology (CAST)

Washington, DC | Remote

Research Assistant

Dec 2024 - Feb 2025

- **Supported national AI talent-allocation research** by reconciling institutional evidence and building a documented Python linear model for reproducible forecasting and stakeholder analysis.

Springer Capital

Chicago, IL

Data Analyst and Automation Intern

Aug 2024 - Oct 2024

- **Improved management reporting and process visibility** by analyzing operational data with Python, SQL, Excel, and Power BI and connecting Power Platform and CRM workflows.

Chihuo Inc.

Remote

Data Analyst

Jun 2024 - Sep 2024

- **Supported North American market strategy** by analyzing demographic, behavioral, and preference data with Python and Excel, contributing visualizations and recommendations to a 200+ page Asian food industry white paper.

SELECTED TECHNICAL AND RESEARCH PROJECTS

Multi-Agent OpenClaw

Jan 2026 - Present

Technologies: TypeScript, Node.js, Express, Zod, agent orchestration, persistent memory, automated QA

- **Built a multi-agent orchestration system** that routes work by task type and complexity, persists run memory, and exports QA-gated Markdown/DOCX artifacts across seven validated tests.

Adaptive Thinking and Reinforcement Learning

2026

Technologies: Python, PyTorch, DreamerV3, PPO, adaptive computation, experiment diagnostics

- **Benchmarked adaptive halting and reinforcement-learning workflows**, documenting sparse-retrieval failure modes, training tradeoffs, and reproducible evaluation results.

Badminton AI Match Analysis

2026

Technologies: Python, computer vision, player tracking, pose estimation, video processing

- **Developed a two-player match-analysis pipeline** with stable tracking, pose overlays, shuttle recovery, and annotated video visualization.

ClearMove - AI-Powered Rental Evidence Platform

Oct 2025 - Present

Technologies: Next.js, TypeScript, PostgreSQL, Drizzle ORM, Gemini API, pdf-lib

- **Led 50+ stakeholder interviews** and shipped a deployed evidence workflow across 21 API routes and 10 PostgreSQL tables, transforming lease and inspection inputs into auditable, timestamped PDFs.

TableUs - AI-Assisted Group Restaurant Discovery

2026

Technologies: Next.js, React, Python, FastAPI, Gemini API, Google Maps API

- **Built an explainable group recommendation workflow** combining user preferences, location, and natural-language input; earned Second Place at the 2026 Cursor Hackathon through an explainable, location-aware group decision flow.

Brain-Computer Interface MVP

2026

Technologies: Python, Streamlit, real-time signal pipelines, interactive visualization

- **Built an end-to-end neural-signal prototype** to process, inspect, and visualize streaming data for applied BCI experimentation.

Dungeons & Dragons Voice Adventure

2026

Technologies: Gemini Live, multimodal voice interaction, dynamic visuals

- **Delivered a real-time storytelling system** with turn-based gameplay, live agent responses, multimodal voice interaction, and dynamically generated visual feedback.

prompttrace - LLM Observability

2026

Technologies: LLM tracing, latency logging, failure analysis, cost analytics

- **Built experiment observability for LLM workflows**, exposing failures, latency, and spend so model behavior could be debugged and optimized across repeated runs.

llm-fit - Local Model Hardware Advisor

2026

Technologies: Local LLM hardware fit estimation, model selection, command generation

- **Translated device constraints into compatible local-model choices and runnable commands**, helping users evaluate deployment feasibility before downloading or serving a model.

OPEN SOURCE CONTRIBUTIONS

- **Recorded 213 merged pull requests**, including 201 merged contributions to external repositories, as verified through the GitHub API on September 22, 2026.
- **Cloudflare vinext #2521**: propagated resolved Next.js server externals into Nitro traceDeps while preserving and de-duplicating user configuration; added regression coverage across default packages, custom externals, development mode, and production builds.
- **Microsoft APM #1971**: enforced least-privilege 0o700 permissions for deployed plugin executables and normalized deny-list identities to prevent bypasses through casing, .git suffixes, or alternate GitHub URL forms; added integration and mutation-regression tests.
- **NVIDIA NemoClaw #5676**: hardened agents-list parsing against warning text and multiple JSON response schemas while preserving agent-ID filtering; validated the change with targeted tests, linting, CLI builds, and type checking.
- **Meta DotSlash #16**: added portable SHA-256 verification for downloaded release assets before extraction, resolving platform-specific asset metadata and supporting sha256sum with a shasum fallback across macOS, Windows, and Linux release targets.

LEADERSHIP AND ACTIVITIES

- **Badger Blockchain E-Board, Social Media and Communications** | Summer 2026 - Present
- **Badminton E-Board** | Spring 2025 - Present
- **China and U.S. Engagement at GWU - Founder and Head of Logistics** | Aug 2024 - Present
- **China Student Development Think Tank - Leader and Head Scheduler** | Aug 2023 - Present
- **UW-Madison Data Science Club** - promoted technical events and organized weekly Python, R, and Excel workshops.
- **VEX Robotics Club** - built and maintained a C++ robot and evaluated routing strategies for competitive matches.

ACHIEVEMENTS

- Second Place, 2026 Cursor Hackathon - TableUs
- Third Prize, 2025 Badger Build Fest Venture Track - ClearMove
- Second Place, 2024 GWU Data Science Association Datathon (Python)
- Second Place (Skills) and Third Place (Qualification), 2023 VEX Robotics World Championship (C++)
