

CHING-WEI (WILLIAM) KANG

Madison, WI | 347-866-8326 | ckang53@wisc.edu | [linkedin.com/in/kcw2027](https://www.linkedin.com/in/kcw2027) | github.com/WilliamK112

EDUCATION

University of Wisconsin-Madison

B.S. Computer Science and Data Science | GPA: 3.91/4.0

Madison, WI

Expected May 2027

Relevant coursework: Statistical Modeling, Linear Algebra, Data Science Programming, Artificial Intelligence, Data Structures & Algorithms, Discrete Math.

The George Washington University

Undergraduate coursework in Computer Science and Data Science | GPA: 3.94/4.0

Washington, DC

2023 - 2024

DATA SKILLS

Programming: Python, SQL, R, Java, TypeScript

Analytics: Pandas, Excel, Power BI, Plotly, Matplotlib, statistical modeling, data visualization, forecasting, data quality

Data systems: PostgreSQL, SQLite, REST APIs, BeautifulSoup, Requests, Power Automate, Power Apps, Microsoft Lists

DATA AND RESEARCH EXPERIENCE

Global AI (Global API Inc.)

New York, NY | Hybrid

Full-Stack Engineering Intern

May 2026 - Present

- **Made long-running AI generation jobs reliable and measurable** by building FastAPI workflows backed by PostgreSQL and Redis, with validation, cache-backed processing, failure recovery, and operational observability.
- **Improved cross-functional visibility** by partnering with the CEO and four departments to translate reporting needs into an SSE-streamed dashboard for real-time progress, debugging, and release monitoring.

China Association for Science and Technology (CAST)

United States | Remote

Research Assistant

Dec 2024 - Feb 2025

- **Supported national AI talent-allocation research** by reconciling multi-source policy evidence and building a documented Python linear model, delivering reproducible forecasts for project stakeholders.

The Marcus Harris Foundation

Washington, DC

Data Engineering and Automation Intern

Sep 2024 - Dec 2024

- **Made public nonprofit tax records analysis-ready** by building a Python pipeline with BeautifulSoup, Requests, and Pandas, using reusable parsers, schema validation, and auditable source fields.
- **Improved reporting quality** by loading 50,000+ records into PostgreSQL with 98% accuracy and applying filters across EIN, filing year, tax category, and geography for reproducible management analysis.

Springer Capital

Chicago, IL

Data Analyst and Automation Intern

Aug 2024 - Oct 2024

- **Enabled recurring management decisions** by consolidating operational data from databases, APIs, spreadsheets, and web sources with Python, SQL, Excel, and Power BI into KPI and reporting workflows.
- **Reduced fragmented reporting handoffs** by connecting Power Automate, Power Apps, Microsoft Lists, and Scoro CRM, improving data consistency and operational visibility across recurring processes.

Chihuo Inc.

Remote

Data Analyst

Jun 2024 - Sep 2024

- **Supported North American market strategy** by analyzing demographic, behavioral, and preference data with Python and Excel, contributing visualizations and recommendations to a 200+ page Asian food industry white paper.

Guangdong Akang Health Technology Group Co., Ltd.

China | On-site

AI & Software Engineering Intern

Jul 2026 - Aug 2026

- **Made multi-source pharmaceutical research auditable** by normalizing records into JSON and SQLite datasets with source IDs, retrieval dates, validation metadata, citation checks, and reproducible exports.

SELECTED DATA PROJECTS

ClearMove - Rental Evidence Data Platform

Oct 2025 - Present

Technologies: PostgreSQL, SQL, Drizzle ORM, TypeScript, Gemini API, pdf-lib

- **Designed data flows across 10 PostgreSQL tables and 21 API routes**, converting lease and inspection inputs into traceable evidence records and timestamped PDF exports with traceable inputs, validation metadata, and reproducible transformations.

TableUs - Group Recommendation System

2026

Technologies: Python, FastAPI, Gemini API, Google Maps API, preference modeling

- **Combined group preferences, geospatial context, and natural-language input** into explainable restaurant recommendations; earned Second Place at the 2026 Cursor Hackathon through an explainable, location-aware group decision flow.

Badminton Match Analytics

2026

Technologies: Python, computer vision, tracking, pose estimation, video visualization

- **Produced structured two-player tracking**, pose overlays, shuttle recovery, and annotated video outputs for repeatable performance analysis, structured comparison, and repeatable review of player movement and rally-level outputs.

OPEN SOURCE

- **Contributed 201 merged pull requests** to external repositories through maintainer review and CI workflows, including GitHub Docs, Docker CLI, Microsoft APM, and NVIDIA NemoClaw.

Leadership: Badger Blockchain E-Board, Social Media and Communications (Summer 2026 - Present); Badminton E-Board (Spring 2025 - Present).

ACHIEVEMENTS

- Second Place: 2024 GWU Data Science Association Datathon (Python) and 2026 Cursor Hackathon (TableUs)
