

CHING-WEI KANG

Madison, WI | 347-866-8326 | ckang53@wisc.edu | [LinkedIn](#)

SUMMARY

Computer Science and Data Science student focused on **backend infrastructure**, **LLM applications**, and **distributed systems**. Built **production full-stack products** spanning cloud deployment, data pipelines, and **end-to-end AI workflows**.

EDUCATION

University of Wisconsin–Madison

Madison, WI

Bachelor of Science in Computer Science and Data Science / GPA: 3.80/4.0

Expected Graduation: Dec 2027

- Relevant coursework: Data Structures & Algorithms, Artificial Intelligence, Computer Engineering, Discrete Math, Data Science Programming, Statistical Modeling, Matrix & Linear Algebra and Mathematical Reasoning.

SKILLS

Programming: Java, Python, JavaScript, TypeScript, SQL, C++, C, Bash, R

Technologies: React, Next.js, Node.js, FastAPI, PostgreSQL, Redis, AWS, Docker, REST APIs

PROFESSIONAL EXPERIENCE

Global AI (Global API Inc.)

New York, NY

Full-Stack Engineering Intern

May 2026 – Present

- **Shipped full-stack features** in Next.js/TypeScript and FastAPI with PostgreSQL/Redis, RBAC, observability, and **weekly CI/CD releases**.
- **Architected a 4-stage AI ad pipeline** from **3-view product input** to product-consistent keyframes, parallel video generation, and ffmpeg assembly; supported **3 animation backends** at **720p/1080p**.
- **Built a stakeholder dashboard** backed by **14 FastAPI endpoints** and SSE progress streaming; parallelized Gemini keyframes across **up to 4 workers**, cached keyframes/segments, and added **7 persona-based voice profiles**.

China Association for Science and Technology (CAS)

Remote, United States

Research Assistant

Dec 2024 – Feb 2025

- Analyzed policy trends across AI and strategic technology ecosystems, synthesized multi-source findings, and **built a Python-based linear model** to support quantitative forecasting and analysis for project stakeholders.

The Marcus Harris Foundation

Washington, DC

Data Engineering & Automation Intern

Sep 2024 – Dec 2024

- **Designed and implemented** a Python data-ingestion pipeline using BeautifulSoup, Requests, and Pandas to automate collection and transformation of nonprofit tax data from multiple public registries.
- Developed **custom HTML parsers and regex filters** for filing year, tax category, EIN, and geographic region; loaded **50,000+ records** into PostgreSQL with **98% accuracy**.

PROJECTS

ClearMove – AI-Powered Rental Evidence Platform

Oct 2025 – Present

Technologies used: Next.js, TypeScript, React, Node.js, PostgreSQL, Drizzle ORM, Google Gemini API, pdf-lib

- Led **50+ stakeholder interviews** and shipped a deployed renter/property-manager evidence workflow across **21 API routes** and **10 PostgreSQL tables**; used Gemini to turn inspection and lease inputs into **auditable, timestamped PDFs**, earning **Third Prize** in the UW–Madison Venture Track.

Multi-Agent OpenClaw

Jan 2026 – Present

Technologies used: TypeScript, Node.js, Express, Zod, REST APIs, dotenv, local orchestration systems, file-based workflow pipelines

- **Designed and built** a **20-endpoint orchestration system** that routes work across **3 task types** and **3 complexity tiers**, reuses persistent run memory, and exports **QA-gated Markdown/DOCX artifacts**; validated core flows with **7 automated tests**.

AI-Powered Interactive Game – Dungeons & Dragons Adventure

Sep 2025 – Present

Technologies used: React, TypeScript, Tailwind CSS, Google Gemini API (Pro Flash, Imagen, Veo), JSON Schema, Node.js

- **Designed and developed** an AI-driven narrative RPG web application integrating **Gemini Pro/Flash, Imagen, and Veo** for **real-time, player-directed text, image, and video generation**.

ACTIVITIES

UW-Madison Data Science Club

- Promoted coding events and online talks to UW–Madison students and **organized weekly Python, R, and Excel workshops**.

Vex Robotics Club

- **Built and maintained a C++ robot** and evaluated routing strategies to select optimal moves during matches.

ACHIEVEMENTS

1. **Third Place**, 2025 University of Washington Hackathon
2. **Second Place**, 2024 GWU Data Science Association Datathon (Python-based)
3. **Second Place (Skills)** and **Third Place (Qualification)**, 2023 VEX Robotics World Championship (C++-based)
